

# RADIANCE MEDSPA OF WESTCHESTER MARKS ITS TWO-YEAR ANNIVERSARY

Since April 2007 Radiance Medspa of Westchester has brought upscale, Manhattan-level medical skin and cosmetic services to the region's backyard. To celebrate its two-year anniversary as the premiere medspa of northern Westchester, Radiance has added three revolutionary new treatments: Super Slim Lipo Body Sculpting, Fractional skin resurfacing, and Thermage skin tightening,

Laser-assist tumescent lipolysis is the newest, safest, most effective way to permanently remove fat, tighten skin, and re-sculpt the body. One of the first facilities in the county to offer Super Slim Lipo Body Sculpting, Radiance also marks its anniversary with the recent arrival of Neil C. Goodman, M.D., Ph.D., F.A.C.O.G., F.A.A.C.S., who has performed over 1500 of these cutting-edge procedures on all areas of the body including the abdomen, under chin and neck, upper back, love handles, arms, etc. (Fat transfers to the breast and buttocks area, when needed, to gain the desired shape, are also performed.) A nationally recognized laser lipolysis expert, Dr. Goodman is a sought-after lecturer at professional conferences, conducts training seminars for other M.D.s on laser-assisted lipolysis, and continues to run his 5th Avenue practice in New York City.

Recently at Radiance, a 52-year-old Pleasantville-based woman came to see Dr. Goodman for Super Slim Lipo Body Sculpting after having undergone a hysterectomy that resulted in excessive weight gain. "Now I have a nice little shape, a shape I haven't seen since before I had children." After witnessing her success, this client's husband, a financier, then decided to also have the procedure done. She said, "He had just un-

dergone a very stressful period at work and gained a lot of weight. Then he lost his job. This procedure has really helped him to move forward and get back on track."

Secondly, Radiance is now offering Fractional Skin Resurfacing using Palomar Medical's 1540 laser to treat acne scarring, fine lines and wrinkles, melasma (brown pigment), and to improve overall skin tone and color. This latest tool in skin resurfacing technology produces the same results as its competitor Fraxel but without the same pain and down time.

Thermage skin tightening, the third latest innovation available at Radiance is a safe, noninvasive procedure that tightens existing skin and stimulates new collagen growth. Thermage is an effective treatment for loose, sagging skin on the face and body, as well as for cellulite reduction.

With a Laser Lipo MD and trained Thermage clinicians on staff, Radiance is in a unique position to evaluate clients with loose skin and/or unwanted fat under the chin - or other body areas. It takes this combination of medical and clinical expertise to advise clients on whether Laser Lipo or Thermage will give them the best result. Spa Manager, Patricia Giano says "many other facilities simply do not have this level of medical & clinical expertise to properly advise their clients and insure optimum results."

In addition to these three latest offerings, Radiance continues to offer the highest quality medical skin and laser services administered by top New York State licensed medical aestheticians. Plus Radiance is the only facility

in the area using Palomar Medical's System of four specialized IPL Lasers, each designed to treat different skin care needs: skin rejuvenation (sun damage, aging); skin resurfacing (acne scarring, fine wrinkles, stretch marks); and permanent hair removal on both dark or light skin tones. Other facilities often rely on only one or two lasers which cannot provide the optimum results and safety Radiance can with Palomar. The latest in medical grade peels and microdermabrasian treatments are also available.

Wrinkle-reduction and facial sculpting with Botox and other dermal fillers are carried out by Dr. Goodman who has performed over 10,000 of these procedures. A 60-year-old female client from Greenwich, Connecticut, said, "Dr. Goodman made me look fifteen years younger—without plastic surgery. He has the eye of an artist and the gentle touch of a surgeon."

People experiencing significant life changes such as a job loss or divorce; to women having trouble regaining their figure after pregnancy; to those who simply want to slow the wrinkles of middle-age—are all appearing at Radiance's doorstep.

"Instead of a downturn in growth, we are experiencing just the opposite," said owner John Whitmer. "More than ever, people want to look—and feel—their best."

Radiance Medspa of Northern Westchester is conveniently located in Mount Kisco Square (near CVS) at 360 North Bedford Road, Mount Kisco. Call 914-242-4882 for a complimentary private consultation or visit [www.radiancewestchester.com](http://www.radiancewestchester.com) for additional information.
